

# PRIVATE WATER SYSTEM

## MAINTENANCE & TIPS

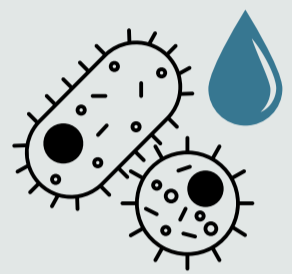

### GET A CONTRACTOR

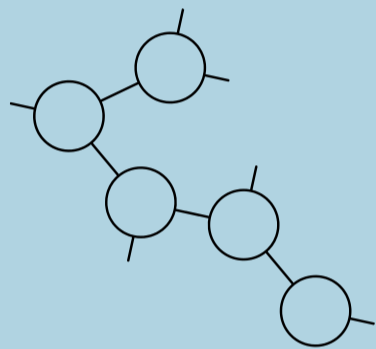

Always use a **registered** contractor to construct a well, install a pump, and for other service needs.

### ANNUAL MAINTENANCE

Have an annual maintenance check that includes a bacterial test. Test for Total Coliform and E.Coli.

### CHEMICALS

Be sure to keep hazardous chemicals far away from the well. This includes materials such as paint, fertilizers, pesticides, motor oil, etc.

### PROPER SEPARATION

Maintain proper distance between the well and buildings, waste systems, and chemical storage facilities.

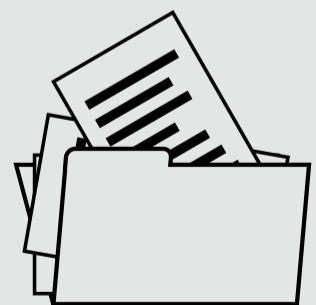

### BE CAUTIOUS

When mowing or working near the well, be sure to not cause any damage to the well cap. Avoid piling yardwaste or snow on the cap, as well.

### KEEP RECORDS

Keep and maintain all records related to your water system in a safe place.
